Long-toed Stint (Calidris subminuta), Salinas sewage ponds,
California. 31 August 1988.

Western Birds solicits papers that are both useful to and understandable by
amateur field ornithologists and also contribute significantly to scientific litera-
ture. The journal welcomes contributions from both professionals and
amateurs. Appropriate topics include distribution, migration, status, identifica-
tion, geographic variation, conservation, behavior, ecology, population
dynamics, habitat requirements, the effects of pollution, and techniques for
censusing, sound recording, and photographing birds in the field. Papers of
general interest will be considered regardless of their geographic origin, but
particularly desired are reports of studies done in or bearing on the Rocky
Mountain and Pacific states and provinces, including Alaska and Hawaii,
western Texas, northwestern Mexico, and the northeastern Pacific Ocean.

Send manuscripts to Philip Unitt, 3411 Felton Street, San Diego, CA 92104.
For matter of style consult the Suggestions to Contributors to Western Birds (8
pages available at no cost from the editor) and the Council of Biology Editors
Style Manual (available for $24 from the Council of Biology Editors, Inc., 9650
Rockville Pike, Bethesda, MD 20814).

Reprints can be ordered at author’s expense from the Editor when proof is
returned or earlier.

Good photographs of rare and unusual birds, unaccompanied by an article but
with caption including species, date, locality and other pertinent information,
are wanted for publication in Western Birds. Submit photos and captions to
Photo Editor.
