  California; © Peter LaTourrette of Los Altos, California;
  and © Bob Steele of Ridgecrest, California: Red-winged
  Blackbird (Agelaius phoeniceus) and Tricolored Blackbird
  (Agelaius tricolor).

Western Birds solicits papers that are both useful to and understandable by amateur
  field ornithologists and also contribute significantly to scientific literature. The journal
  welcomes contributions from both professionals and amateurs. Appropriate topics
  include distribution, migration, status, identification, geographic variation, conserva-
  tion, behavior, ecology, population dynamics, habitat requirements, the effects of
  pollution, and techniques for censusing, sound recording, and photographing birds in
  the field. Papers of general interest will be considered regardless of their geographic
  origin, but particularly desired are reports of studies done in or bearing on the Rocky
  Mountain and Pacific states and provinces, including Alaska and Hawaii, western
  Texas, northwestern Mexico, and the northeastern Pacific Ocean.

Send manuscripts to Kathy Molina, Section of Ornithology, Natural History Museum
  of Los Angeles County, 900 Exposition Blvd., Los Angeles, CA 90007. For matters
  of style consult the Suggestions to Contributors to Western Birds (at www.wfo-cbrc.
  org/journal.html).

Good photographs of rare and unusual birds, unaccompanied by an article but with
  caption including species, date, locality and other pertinent information, are wanted
  for publication in Western Birds. Submit photos and captions to Photo Editor. Also
  needed are black and white pen and ink drawings of western birds. Please send these,
  with captions, to Graphics Manager.
